WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

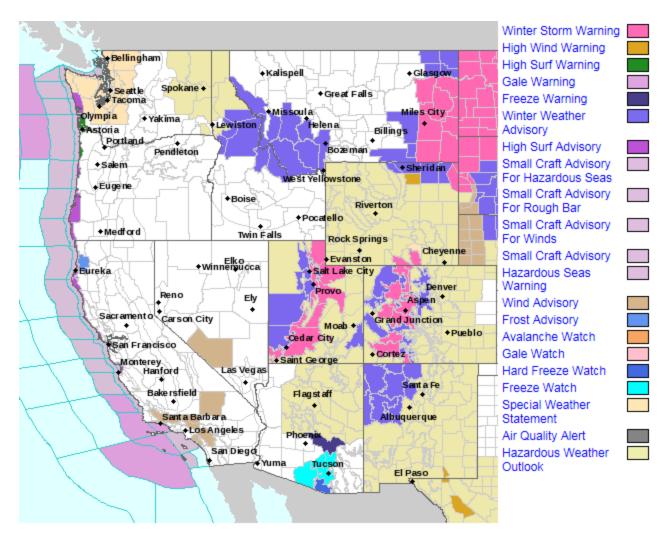

An unsettled weather pattern will continue across Northern California over the next seven days. More precipitation can be expected at times, particularly in the northern half. The remains of one weather system will be moving out of Northern California today, but lingering mountain showers are expected in the north and east yet. Snow levels will be from about 4000 feet in the north to around 5000 feet in the south. There shouldn't be a lot of accumulation at those elevations today, however. Higher pressure and dry weather will be in place Tuesday, but Tuesday night another weather system will move ashore to bring more precipitation into Northern California, mainly for the north half of the coast and the northern and eastern mountains again. Stronger high pressure and dry, warmer weather for all areas will follow that the latter half of the week. Yet another weather system is expected to move ashore over the weekend, but most of the clouds and precipitation from that look to be most likely in the northern half of Northern California. Some wind events can be expected at times the rest of this week for some areas. Today's winds will be gusty westerly winds in our eastern areas this morning with some gusts as strong as 45 mph in the higher elevations possible. North winds will develop as the stronger high pressure comes in later this week that will be strongest in the traditional Sacramento Valley/foothill locations. Temperatures will be around seasonally cool values for the most part, although later this week they will be somewhat above normal for many areas. Significant fire weather is not really an issue for the next 7 days. However, some of the wind events are of concern for blowing down trees in soaked-soil areas. Weather conditions will also create some winter travel conditions in the mountains.

SOUTHERN CALIFORNIA

A Pacific trough will bring scattered showers with less than a quarter inch of rainfall to the Sierra this morning. The snow level will be around 7,000 feet. This trough will also bring westerly winds of 20 to 30 mph with gusts to 50 mph to the wind prone mountain and desert areas through this afternoon. North winds of 20 to 30 mph with gusts to 50 mph will occur from Santa Barbara County eastward to western Los Angeles County late this afternoon through the overnight hours. Temperatures will be 5 to 10 degrees below normal today, with mid 30s to mid 40s across the mountains and mid 50s to mid 60s in the valleys. A weak ridge of high pressure building into California from the Pacific Ocean will warm temperatures to near normal and drop minimum humidity to 15% to 30% across most of the region Tuesday and Wednesday. Northeast to east winds of 15 to 25 mph with gusts to 40 mph will surface across the mountains and below the canyons and passes of Southern California Tuesday morning through early Tuesday afternoon. A trough dropping south from Canada will bring cooler temperatures to the region Thursday and Friday. At this time, it looks as though this trough will be fairly dry and have no rainfall with it. A ridge of high pressure will bring significant warming and very low humidity away from the Central Valley this weekend. Very strong north to northeast winds will surface across the mountains and below the canyons and passes of Southern California Friday morning through Saturday afternoon.

CAL OES LAW ENFORCEMENT MISSIONS

New Cal OES Law Missions

• 2016-LAW-28680 11/27/16, 2124 hours. El Dorado County Sheriff's Office (EDSO) is requesting Search and Rescue (SAR) mutual aid to assist locating a couple in their 60's who's vehicle is reportedly stuck in the snow in the Wentworth Springs/Ice House area in the high country. The pair, who are in a white Dodge Ram truck, were due home Saturday evening. They texted family members on Sunday morning advising they were stuck in the snow. The family, in turn, called the SO at 1030 hours. Sunday. EDSO searched all day by Off Highway Vehicles (OHV) and assisted with a helicopter from CHP, but have been unable to locate them. EDSO is requesting 4-5 snow mobile operators and OHV's (Snow Capable). EDSO is also utilizing their memorandum of understanding (MOU) with Douglas County, NV for resources in addition to CHP H-20 who will assist again today (Monday). Update: 11/28, 0357 hours, Air Force Rescue Coordination Center (AFRCC) has been requested to conduct cell phone forensics. They accepted the mission. Update: 0630 hours, Placer County Sheriff's Office is assisting with 3 snowmobiles and 2 Utility Task Vehicles (UTV). Alpine SO will attempt to send snowmobiles later. All mutual aid will report to the Command Post at County Fire Station #2 at 7331 Wentworth Springs Rd., Georgetown. Update: 0730 hours, EDSO advised the Verizon Cell Tower is down which is severely hampering their communications abilities. They are requesting assistance to rectify. LDO contacted and briefed the T-Comm Duty Officer who will work with California Utilities Emergency Association (CUEA) to acquire the needed equipment, possibly a Cell on wheels (COW) or Cell on light truck (COLT). MISSION ONGOING.

CAL OES MISSIONS

Ongoing Cal OES Missions

- 2016-Coastal-26848: Caltrans Hazmat Manager for DROC for the Clayton Fire in Lake County. On Scene 09/28/16 12/16/16. Mission Ongoing.
- 2016-Coastal-26842: CDFW Oil Spill Prevention Specialist for the Clayton Fire in Lake County. To be On Scene 10/03/16 12/16/16. Mission Ongoing.
- 2016-Coastal-26477: Cal Recycle debris removal assistance requested for the Clayton Fire in Lake County; on scene through Mid-December. Mission Ongoing.
